Exit Cognos Configuration Manager without saving!!

Apply Fix Pack TO FM (MUST BE at SAME FP AS ALL OTHER BI COMPONENTS)

Note : Configuration assumes FM is installed on same system as BI Server
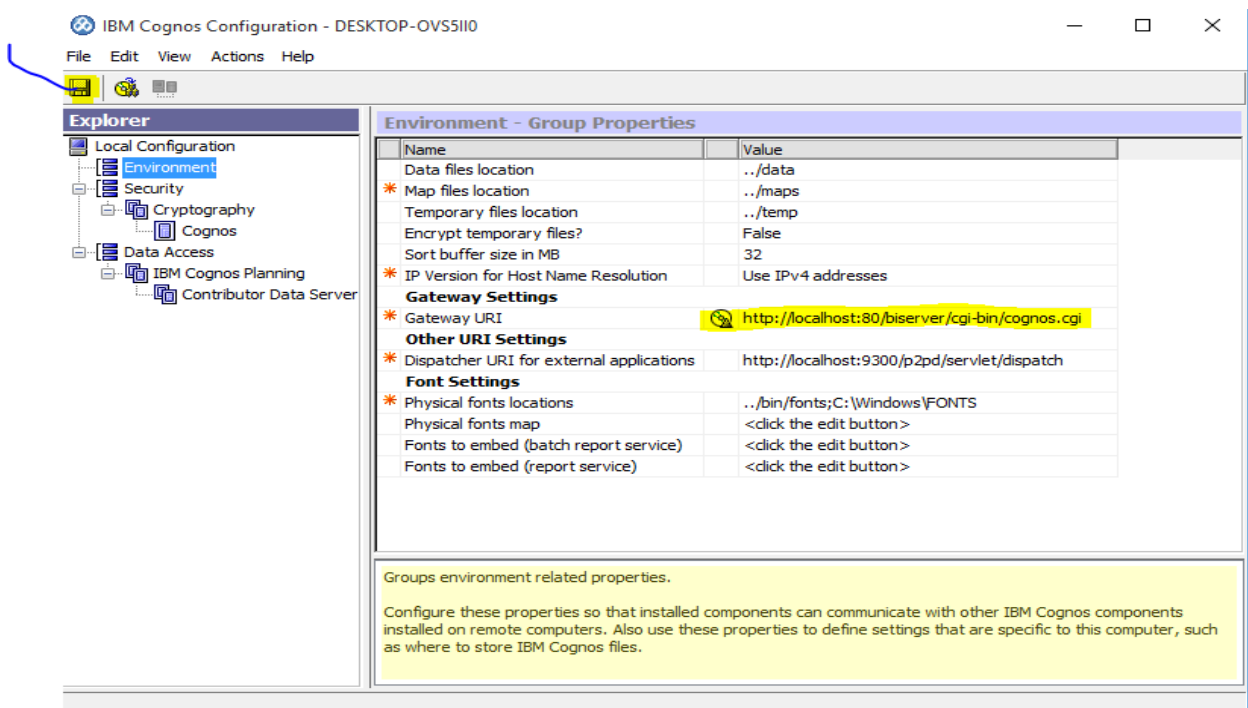

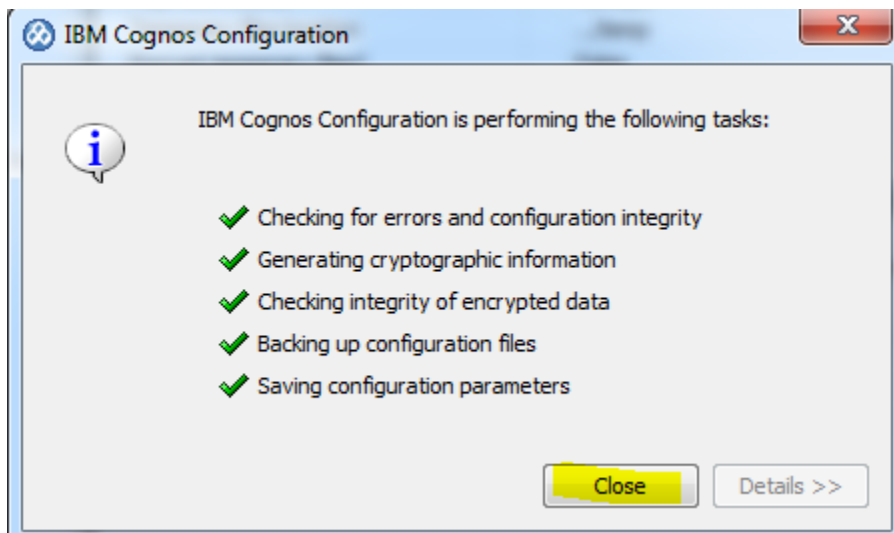

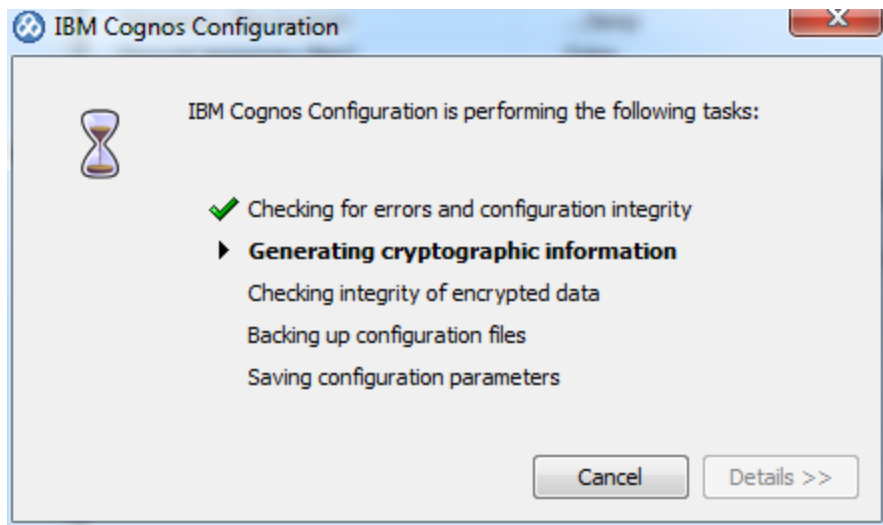

Challenge:

1. Which part of the "Gateway URI" parameter value would change if the DQA client and BI server were running on different systems?
2. List other parameters that would require modifications as a consequence of the DQA client and BI server running on different systems?
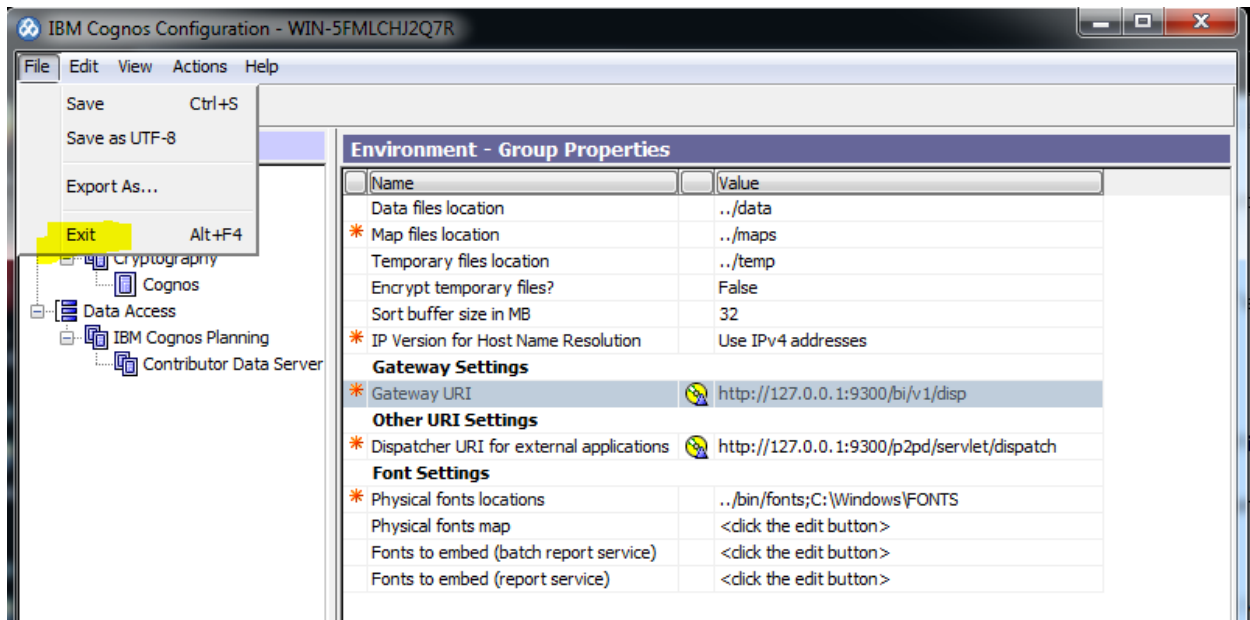

Framework Manager can now be used!
